

Sustainable Public Procurement-fiche

Product / service	Version	Date
Street lighting and traffic lights	Advanced	December 2010

Some clarification:

Since August 2010, the Federal Public Service for Sustainable Development has harmonized the criteria for this category of products with those of the European Commission. Doing so, it follows the Federal Action Plan on Green Public Procurement 2009-2011 which asks for the largest possible harmonization of criteria at all different levels of power (European, federal and regional).
